

I am an American. I live in the constitution and the right to bear arms. the reason our founder put that right in place was one of revolution. The people are who the government is accountable to and the people have the right to change the government with ballots or bullets. this was a fail safe mechanism for when our government decides to cast aside the rights of the people. having a "assault rifle" is exactly what the framers were thinking. something that was on par with what the military and police can use against us when they chose to violate our god given rights.

Can I trust a government as corrupt and self serving as ours with the power to control what kind, how many, and make lists of who has weapons. lists, registration and being forced to file paperwork for every gun sold is just the first step on the slippery slope to confiscation . I hope you all fear.
